Until September 4, 1974, being forty days after the date of the original offering hereof, all dealers effecting transactions in the registered securities, whether or not participating in this distribution, may be required to deliver a Prospectus. This is in addition to the obligation of dealers to deliver a Prospectus when acting as underwriters.

REGISTRATION STATEMENT

Industrial Development Bank of Israel Limited has filed with the Securities and Exchange Commission, Washington, D. C., a registration statement (herein together with all amendments thereto called the "Registration Statement") under the Securities Act of 1933, as amended, with respect to \$50,000,000 7½% Registered Subordinated Capital Notes ("Notes") being offered to the public. This Prospectus omits certain information contained in the Registration Statement. For further information, reference is made to the Registration Statement and to the exhibits thereof.

TERMS OF OFFERING

The Notes are being offered hereby only to non-residents of the State of Israel at the face value of \$1,000 per Note or in multiples thereof. The purchase price is payable either in United States dollars or in State of Israel Bonds (Second, Third, Fourth and Fifth Development Issue, Development Investment Issue or Second, Third or Fourth Development Investment Issue), provided, in the case of the Development Issues, such bonds are at least five years old. The value of the bonds so tendered shall be their nominal values together with interest on coupon bonds and appreciation on savings bonds credited through the last day of the month preceding the month in which the bonds are delivered to the Underwriter. In the case of coupon bonds, the bonds must have attached thereto all interest coupons which mature after the date of delivery of the bonds to the Underwriter.

Each of the Development Issue Bonds bears interest at the rate of 4% per annum and the Development Investment Issue Bonds bear interest at the rate of 4¾% per annum and the Second, Third, and Fourth Development Investment Issue Bonds bear interest at the rate of 5½% per annum. All are direct and unconditional obligations of the State of Israel.

The Bank has been advised by its counsel, Goldstein, Shames & Hyde, that persons who pay for the Notes with State of Israel Bonds will be subject to income tax in the United States at capital gains rates on the excess, if any, of the amount at which such Bonds are accepted as payment for the Notes (other than accrued interest on Coupon Bonds and appreciation on Savings Bonds) over the amount paid for the Bonds. Such accrued interest and appreciation will be taxable as ordinary income.

Arrangements have been made for the re-purchase at face amount plus accrued interest in United States currency, of Notes offered by the estate of the original holder thereof, if an individual, or from the estate of the last survivor, in the event of more than one individual owner, at any time but no such repurchase shall be made more than two years from the date of death, unless the estate remains open as of such date, at which time said period shall be extended.

Although this offering is being made on a best efforts basis, funds received from the sale of the Notes will not be segregated in an escrow account but will be delivered, upon receipt thereof, by the Underwriter to the Bank.

In September, 1964, a law was passed in the United States providing for a tax payable by persons resident in the United States and acquiring securities of foreign issuers (Interest Equalization Tax). Under the provisions of the law as currently in effect, there is no tax at the present time.

APPLICATION OF PROCEEDS

The proceeds from the sale of the Notes being offered hereby, to the extent received, will be used as part of the capital of the Bank for the general business purposes of the Bank, including an arrangement with the Government of Israel to provide funds for increased sources of work for professionals or persons with academic studies connected with scientific and technological development. (See "Business of the Bank—Nature of Loans".) Since there is no firm underwriting commitment, there is no assurance that any proceeds will be received from this offering. However, if this offering had been completely sold as at March 31, 1974 the Notes would have represented approximately 14.3% of the total outstanding long-term indebtedness of the Bank.
